

Farm Service Agency, USDA

§ 760.641

§ 760.638 Determination of SURE yield.

(a) Except for value loss crops as specified in § 760.634, a SURE yield will be determined for each crop, type, and intended use on a farm, using the higher of the participant's weighted:

(1) Adjusted actual production history yield as determined in paragraph (b) of this section; or

(2) Counter-cyclical yield as determined in paragraph (c) of this section.

(b) The adjusted actual production history yield, as defined in § 760.602, will be weighted by the applicable crop year total planted and prevented planted acres, by crop, type, and intended use for each county. RMA data will be used for calculating the SURE yield for insured crops.

(c) The counter-cyclical yield for a crop on a SURE farm will be weighted in such manner as FSA deems fit taking into account a desire for a consistent system and FSA's ability to make timely yield determinations.

(d) Participants who do not purchase crop insurance or NAP coverage, but who are otherwise eligible for payment, will have a SURE yield determined by the FSA county committee as follows:

(1) A weighted yield, based on planted and prevented planted acres, the location county, crop type, and intended use, will be determined at 65 percent of the county expected yield for each crop.

(2) The SURE yield will be the higher of the yield calculated using the method in paragraph (d)(1) of this section or 65 percent of the weighted counter-cyclical yield as determined in paragraph (c) of this section.

(e) For those participants with crop insurance but without an adjusted actual production history yield, a SURE yield will be determined by the applicable FSA county committee. This paragraph will apply in the case where the insurance policy does not require an actual production history yield, or where a participant has no production history.

[74 FR 68490, Dec. 28, 2009, as amended at 75 FR 19189, Apr. 14, 2010]

§ 760.640 National average market price.

(a) The Deputy Administrator will establish the National Average Market Price (NAMP) using the best sources available, as determined by the Deputy Administrator, which may include, but are not limited to, data from NASS, Cooperative Extension Service, Agricultural Marketing Service, crop insurance, and NAP.

(b) NAMP may be adjusted by the FSA State committee, in accordance with instructions issued by the Deputy Administrator and as specified in § 760.641, to recognize average quality loss factors that are reflected in the market by county or part of a county.

(c) With respect to a crop for which an eligible participant on a farm receives assistance under NAP, the NAMP will not exceed the price of the crop established under NAP.

(d) To the extent practicable, the NAMP will be established on a harvested basis without the inclusion of transportation, storage, processing, marketing, or other post-harvest expenses, as determined by FSA.

(e) NAMP may be adjusted by the FSA State committee, as authorized by The Deputy Administrator, to reflect regional variations in price consistent with those prices established under the FCIA or NAP.

§ 760.641 Adjustments made to NAMP to reflect loss of quality.

(a) The Deputy Administrator will authorize FSA county committees, with FSA State committee concurrence, to adjust NAMP for a county or part of a county:

(1) To reflect the average quality discounts applied to the local or regional market price of a crop due to a reduction in the intrinsic characteristics of the production resulting from adverse weather, as determined annually by the State office of the FSA; or

(2) To account for a crop for which the value is reduced due to excess moisture resulting from a disaster related condition.

(3) For adjustments specified in paragraphs (a)(1) and (a)(2) of this section, an adjustment factor that represents the regional or local price received for
